Jori: Here are the GWDWB briefing documents for the WDD transition. Also, here is the paragraph on what we do – we also have a one-pager on what we do.

GWDWB implements the Safe Drinking Water Act program in Region 5 protecting drinking water via a multi-barrier approach – preventing contaminants from getting into source waters and treating water as necessary. We work with 6 primacy States which implement the program for 43,196 public water systems and direct implementation for 105 Tribal water systems and 1437 aircraft water systems. Region 5 has about 40% of the nation's non-community water system (36,064 PWSs) which are smaller systems serving non-residential customers (e.g., schools, restaurants).
